

## The real business issues when moving to Voip

We run our own business and understand the risk / tolerance considerations in adapting to any new technology.

### You want to:

- » Operate with minimum risk when migrating to a new technology
- » Develop the right blend of old telephony products with new Voip innovations to future-proof your business and keep your choices open
- » Have a clear plan

Uniquely, our independence means we can keep abreast of issues like quality assurance and ever-changing technology. So now for the first time it is possible for you to receive the discounts that your current provider may be keeping for themselves by using Voip.

### We offer:

- » Average savings of between 20-40% on your phone bill
- » Risk / tolerance migration plans
- » VoipEdge support
- » Leading-edge technology
- » Professional, experienced and friendly staff
- » 24 hour setup \*
- » VoipEdge partner finance enabling payment of your new service from what you will save

\* This may vary depending on complexity of your existing system

# VoipEdge

## You have heard the buzz about dramatic phone savings through something called Voip.

voipEdge are here to introduce you to the technology, but with the support and consideration that any new technology take-up deserves.

voipEdge is an independent quality communications company. Our team have over 10 years experience in successfully deploying large scale technology projects. We have access to IT analysts, process planners, relationship managers, support staff and leading-edge technology.

We can provide a complete turnkey solution (BOXEDGE) for large scale businesses that can replace an entire traditional PABX-style phone system and handsets. voipEdge can also use your existing touch phones to get you started provided that you have a broadband internet connection. We can even help you with computer-based calls.
