

embarrassingly  
small...

the revolutionary **Vehicle Recovery System**

# ...more embarrassingly big

Yes our competitors are big... but only on unit size.

Our advanced technology is big where it counts, big on the benefits. We considered the Australian market place and our clients needs. So we made it small...

- The **Smallest** Unit
- The **Smallest** Battery Drain and...
- Active 24/7 Monitoring
- Authorised Driver Recognition
- Accident Detection System
- Integrated Panic / Distress System
- Unrivalled GPS Capabilities
- Silent Alarm System
- Robust & Waterproof to IP66 Standard

## the revolutionary Vehicle Recovery System

The Toughest security rating in the world for stolen vehicle recovery systems is the UK's 'Thatcham Category 5'. Its only reachable by utilising the highest levels of technology and we are the only company in Australia with a system built to this standard.

*'Personal safety & security concerns all of us and I always want the best. I use NEO-TRAC, now you can too'.*

-Troy Corser  
2 Times World  
Superbike Champion
